

Issues_Summary

HelixCode — Issues Summary

Generated **mechanically** from docs/Issues.md by scripts/generate_issues_summary.sh per Constitution §11.4.91 (summary clarity) + §11.4.12 (CM-ISSUES-SUMMARY-SYNC). Do not hand-edit — re-run the generator. Title column carries each item’s H2 heading (self-contained, ≥40 chars per §11.4.91); Notes is the first Closure/Evidence/Resolution line.

Prefix convention: IDs are scope-prefixed (HXC=root project; HXA=HelixAgent; HXL=HelixLLM; HXQ=HelixQA; HXV=LLMsVerifier; VEN=VisionEngine; PAN=panoptic; OPS=LLMOps). See docs/Issues.md “Prefix convention” for the legacy ISSUE-NNN mapping.

ID	Title	Type	Status	Discovered
HXC-153	TestGuard_GetSystemStatus_WithDB_StillReports is named for a database-present case it never exercises	Bug	Queued	
HXC-154	TestStartQASession_Success asserts on a session field a background goroutine is concurrently changing	Bug	Queued	
HXC-155	Standardise the divergent polarity-switch environment variable convention across the server test package	Task	Queued	
HXC-156	harmony_os background system monitor used an unsynchronised on/off flag as its stop signal, racing application shutdown	Bug	Queued	
HXC-157	harmony_os and aurora_os changed on-screen elements directly from background threads, which the Fyne UI toolkit forbids	Bug	Queued	
HXC-158	No test builds the harmony_os or aurora_os screens, so their widget-threading fixes rest on code review rather than captured runtime proof	Bug	Queued	

Counts: 6 tracked item-sections in docs/Issues.md — **6 open** (non-terminal status) / **0 closed** (terminal (→ Fixed.md) status; retained as §11.4.19 migration tombstones).
