HelixCode Phase 3 Video Course - Production Plan

Course Overview

Item	Details
Course Title	HelixCode Phase 3 - Advanced AI Development Features
Total Videos	12 videos
Total Duration	~120 minutes
Target Audience	Intermediate to Advanced Developers
Format	Screen recording with voiceover

Production Schedule

Pre-Production Phase

Task	Status	Owner	Notes
Script writing	Complete	-	All 12 scripts ready
Code examples	Complete	-	Working examples in scripts
Review scripts	Pending	-	Technical accuracy check
Record environment setup	Pending	-	VS Code, Terminal, Browser
Prepare demo projects	Pending	-	Sample HelixCode projects

Production Phase	☒	☐	☐	☐	☐

Video	Script	Recording	Editing	Review	Published
1. Phase 3 Overview	☒	☐	☐	☐	☐
2. Getting Started	☒	☐	☐	☐	☐
3. Session Fundamentals	☒	☐	☐	☐	☐
4. Advanced Sessions	☒	☐	☐	☐	☐
5. Memory Basics	☒	☐	☐	☐	☐
6. Advanced Memory	☒	☐	☐	☐	☐
7. Persistence Basics	☒	☐	☐	☐	☐
8. Advanced Persistence	☒	☐	☐	☐	☐
9. Template Basics	☒	☐	☐	☐	☐
10. Advanced Templates		☐			
11. Integration Patterns					
12. Advanced Workflows					

Legend: Complete | In Progress | Not Started

Recording Requirements

Software

- Screen recorder (OBS Studio or Camtasia)
- Video editor (DaVinci Resolve or Premiere)
- Audio editor (Audacity)
- VS Code with Go extension
- Terminal emulator
- Browser for API testing

Hardware

- Microphone (USB condenser recommended)
- Pop filter
- Quiet recording environment
- 1080p or 4K display
- Sufficient RAM for smooth recording

Recording Settings

- Resolution: 1920x1080 (minimum)
- Frame rate: 30fps
- Audio: 48kHz, 16-bit
- Format: MP4 (H.264)

Video Structure Template

Each video follows this structure:

[0:00] - Title card with video name
[0:10] - Introduction and objectives
[0:30] - Content section 1
[X:XX] - Content section 2
[X:XX] - Content section 3
[X:XX] - Live demo
[X:XX] - Key takeaways summary
[X:XX] - Next video preview
[END] - End card with resources

Editing Guidelines

Visual Elements

- Consistent intro/outro animations
- Chapter markers for navigation
- Code highlighting overlays
- Zoom effects for important areas
- Picture-in-picture for demos

Audio

- Background music (subtle, instrumental)
- Sound effects for transitions
- Normalized audio levels (-16 LUFS)
- Noise reduction applied

Text Overlays

- Key points as bullet overlays
- Code snippets as full-screen
- Error messages highlighted
- URLs and resources shown

Quality Checklist

Per Video

- ☐ Script follows outline
- ☐ Code examples work correctly
- ☐ Audio is clear and consistent
- ☐ Visual quality is good
- ☐ Chapters are marked
- ☐ Transitions are smooth
- ☐ Resources are linked

Course-Wide

- ☐ Consistent branding
- ☐ Proper video numbering
- ☐ Thumbnails created
- ☐ Descriptions written
- ☐ Tags added
- ☐ Playlists organized

Distribution Channels

Platform	Format	Resolution	Notes
YouTube	MP4	1080p/4K	Primary platform
Vimeo	MP4	1080p	Backup/embedding
Website	MP4/HLS	Adaptive	Direct hosting
Download	ZIP	1080p	Offline access

Supplementary Materials

Per Video

- Code examples (GitHub repo)
- Exercise files
- Quiz questions
- Reference links

Course-Wide

- Complete course PDF
- Code repository
- Template library
- Certification exam

Timeline Estimate

Phase	Duration	Milestone
Pre-production	1 week	Environment ready
Recording	2 weeks	Raw footage complete
Editing	2 weeks	Videos polished
Review	1 week	Quality approved
Publishing	1 week	Course live

Total Estimated Time: 7 weeks
