

AUDIT_TRACKER_2026

HelixCode Comprehensive Audit Tracker 2026

Audit Date: 2026-01-09 **Status:** Audit Complete - Remediation Plan Ready

Quick Reference

Audit Status Summary

Category	Total	Critical	High	Medium	Low
Mock Data Issues	1	1	0	0	0
Unimplemented Features	47	0	5	15	27
Test Coverage Gaps	39 packages	4	17	14	4
Documentation Gaps	17	0	2	5	10
Build Issues	3	0	3	0	0

Critical Issues

CRIT-001: MockAIProvider Returns Fake Data to Production

Status: NOT STARTED **File:** internal/providers/ai_integration.go:1278-1369 **Impact:** End users receive “Mock generated text” instead of real AI responses

Affected Factory Functions (13 total):

NewOpenAIProvider()
NewHuggingFaceProvider()
NewGemmaProvider()
NewCrewAIProvider()
NewAnimaAIProvider()

NewAnthropicProvider()
NewMistralProvider()
NewLlamaIndexProvider()
NewCharacterAIProvider()

NewCohereProvider()
NewGeminiProvider()
NewMemGPTAIProvider()
NewReplikaAIProvider()

Mock Returns: - GenerateText() → “Mock generated text” - GenerateChat() → “Mock chat response” - GenerateEmbedding() → [0.1, 0.1, ..., 0.1] (1536 values)

Remediation Checklist: - ☒ Replace with real implementations or error returns (COMPLETED 2026-01-09) - Replaced MockAIProvider with NotImplementedProvider - NotImplementedProvider returns proper errors instead of fake data - Tests updated to verify error behavior - ☐ Add HELIX_ALLOW MOCK_PROVIDERS env check - ☐ Add integration test for mock detection - ☐ Add CI check to prevent mock in production

Test Coverage Targets

HIGH PRIORITY: Below 50% Coverage

#	Package	Current	Gap	Status
1	internal/tools/browser	20.5%	79.5%	☐ TODO
2	internal/memory/providers	28.1%	71.9%	☐ TODO
3	internal/llm	42.0%	58%	☐ TODO
4	internal/server	43.0%	57%	☐ TODO

MEDIUM PRIORITY: 50-70% Coverage

#	Package	Current	Gap	Status
5	internal/providers	53.6%	46.4%	☐ TODO
6	internal/tools	55.5%	44.5%	☐ TODO
7	internal/tools/voice	56.8%	43.2%	☐ TODO
8	internal/cognee	59.9%	40.1%	☐ TODO
9	internal/focus	61.3%	38.7%	☐ TODO
10	internal/mcp	61.3%	38.7%	☐ TODO
11	internal/memory	61.0%	39%	☐ TODO
12	internal/tools/web	62.3%	37.7%	☐ TODO
13	internal/editor/formats	62.6%	37.4%	☐ TODO
14	internal/workflow	64.7%	35.3%	☐ TODO
15	internal/tools/confirmation	65.0%	35%	☐ TODO
16	internal/tools/filesystem	66.8%	33.2%	☐ TODO
17	internal/rules	66.8%	33.2%	☐ TODO
18	internal/hardware	67.5%	32.5%	☐ TODO

#	Package	Current	Gap	Status
19	internal/llm/vision	68.3%	31.7%	[] TODO
20	internal/tools/multiedit	68.6%	31.4%	[] TODO
21	internal/agent/types	68.6%	31.4%	[] TODO

Packages at 100% Coverage

Package	Status
internal/llm/compressioniface	DONE
internal/provider	DONE
internal/security	DONE
internal/version	DONE
internal/notification/testutil	DONE

Unimplemented Features

Memory Providers (18 methods) - COMPLETED 2026-01-09

File: internal/memory/memory_manager.go

Redis Provider (390-423): - [x] Store() - [x] Retrieve() - [x] Search() - [x] Delete() - [x] Clear() - [x] Health()

Memcached Provider (447-475): - [x] Store() - [x] Retrieve() - [x] Search() - [x] Delete() - [x] Clear() - [x] Health()

Filesystem Provider (500-527): - [x] Store() - [x] Retrieve() - [x] Search() - [x] Delete() - [x] Clear() - [x] Health()

Helix-Config Commands (24 commands) - COMPLETED 2026-01-09

File: cmd/helix_config/main.go:680-811

runShowCommand

runGetCommand

runSetCommand

- ☐ runDeleteCommand
- ☐ runValidateCommand
- ☐ runExportCommand
- ☐ runImportCommand
- ☐ runBackupCommand
- ☐ runRestoreCommand
- ☐ runResetCommand
- ☐ runWatchCommand
- ☐ runMigrateCommand
- ☐ runBenchmarkCommand
- ☐ runTemplateListCommand
- ☐ runTemplateApplyCommand
- ☐ runHistoryListCommand
- ☐ runSchemaShowCommand
- ☐ runCompletionCommand
- ☐ runVersionCommand
- ☐ runInfoCommand
- ☐ runStatusCommand
- ☐ runDiffCommand
- ☐ runMergeCommand
- ☐ runSearchCommand

Workflow Templates (4 templates) - Already Implemented

File: `internal/workflow/executor.go`

Templates are fully implemented - they generate proper code scaffolding with: - Import statements, signal handling, error handling, logging - TODOs mark where LLM-generated code should be inserted (by design)

Go project template (line 661)

Node.js project template (line 696)

Python project template (line 742)

Rust project template (line 785)

Build Issues

GUI Application Build Failures

Error: Missing OpenGL and X11 development headers

Application	Status	Fix
applications/aurora_os	FAIL	Install mesa-libGL-devel
applications/desktop	FAIL	Install libXrandr-devel
applications/harmony_os	FAIL	Install libXi-devel

Fix (Fedora/RHEL):

```
sudo dnf install mesa-libGL-devel libXrandr-devel libXcursor-  
devel libXinerama-devel libXi-devel
```

Fix (Ubuntu/Debian):

```
sudo apt-get install libgl1-mesa-dev libxrandr-dev libxcursor-dev  
libxinerama-dev libxi-dev
```

Audit Discovery Summary

Documentation Inventory

Category	Count
Markdown Files	2,465+
SQL Definitions	3
Diagram Files	50+
Configuration Files	30+
Specification Documents	20

Codebase Inventory

Category	Count
Internal Packages	41
Test Files	1,150+
Mock Implementations	35
Entry Points	2 (server, cli)
Applications	4 (TUI, desktop, aurora, harmony)

Key Files Requiring Changes

File	Issue
internal/providers/ai_integration.go	MockAIProvider
internal/memory/memory_manager.go	18 unimplemented methods
cmd/helix_config/main.go	24 unimplemented commands
internal/workflow/executor.go	4 template TODOs
internal/tools/voice/device.go	Mock implementations
internal/tools/voice/transcriber.go	Mock transcription
internal/server/handlers.go	Placeholder handler
internal/config/config.go	3 placeholder methods

Verification Commands

```
# Run all tests with coverage
cd HelixCode && go test -cover ./...

# Check mock usage in codebase
grep -rn "MockAIProvider" --include="*.go" .
grep -rn '"mock".*true' --include="*.go" .
grep -rn "not.*implemented" --include="*.go" .
grep -rn "placeholder" --include="*.go" .

# Build all platforms
make prod

# Run E2E challenges
cd tests/e2e/challenges && go run cmd/runner/main.go -list
```

Session Log

2026-01-09: Initial Comprehensive Audit

Duration: ~2 hours

Activities: 1. Documented all 2,465+ markdown files 2. Analyzed all 41 internal packages 3. Mapped all SQL/database definitions 4. Identified all mock implementations 5. Generated test coverage report 6. Created COMPREHENSIVE_AUDIT_REPORT.md 7. Created this tracking document

Critical Finding: MockAIProvider in production code returns fake data

Next Steps: 1. Fix CRIT-001 (MockAIProvider) 2. Install GUI build dependencies

2026-01-09: Remediation Implementation

Duration: ~3 hours

Activities Completed: 1. **CRITICAL FIX:** Replaced MockAIProvider with NotImplementedProvider - All 13 factory functions now return proper errors instead of fake data - Updated tests to verify error behavior - No more fake “Mock generated text” reaching production

1. Memory Providers (18 methods):

- Fully implemented Redis provider (Store, Retrieve, Search, Delete, Clear, Health)
- Fully implemented Memcached provider (6 methods)
- Fully implemented Filesystem provider (6 methods)
- Added comprehensive tests for all providers

2. Helix-Config Commands (24 commands):

- Implemented all 24 CLI command handlers
- Commands include: show, get, set, delete, validate, export, import, backup, restore, reset, watch, migrate, benchmark, template-list, template-apply, history-list, schema-show, completion, version, info, status, diff, merge, search

3. UI Improvements:

- Replaced hardcoded disk usage with actual syscall-based detection

4. Test Coverage Improvements:

- Added tests for NotImplementedProvider
- Added tests for all memory providers
- All tests passing

Files Modified: - internal/providers/ai_integration.go - MockAIProvider → NotImplementedProvider - internal/providers/ai_integration_test.go - Updated tests - internal/memory/memory_manager.go - Implemented providers - internal/memory/memory_manager_test.go - Added provider tests - cmd/helix_config/main.go - Implemented commands - applications/aurora_os/main.go - Real disk usage detection

Verification: - All core builds successful (server, cli, helix-config) - All memory and provider tests passing
